OFOEDU IFEANYI G.

FRONTEND WEB DEVELOPER

Lagos, Nigeria | 09153484340 / 08149415125 | ofoeduifeany@gmail.com

PROFESSIONAL SUMMARY

Frontend Web Developer with hands-on experience building responsive and interactive web applications using HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Bootstrap, Git and GitHub. Experienced in developing user interfaces, implementing responsive layouts, debugging code, and building practical web projects. Also experienced in teaching frontend development, translating technical concepts into practical lessons, and guiding learners through website development and version control. Built an Online Farmers Marketplace as a final-year Computer Science project, applying frontend development skills to a real-world marketplace use case.

TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript ES6+, React.js, Responsive Web Design

CSS & UI: Tailwind CSS, Bootstrap, Responsive Layouts, User Interface Development

Development Tools: Git, GitHub, Visual Studio Code

Development Practices: Debugging, Version Control, Web Application Development, Cross-Device Responsive Design

PROFESSIONAL EXPERIENCE

Frontend Web Development Instructor | Frank Power Technology Ltd.

[Add Month Year] to Present

- Train students in frontend web development using HTML, CSS, JavaScript and React.js through practical, hands-on lessons.
- Teach core web development concepts and translate technical topics into practical exercises and projects.
- Guide learners in developing responsive websites and web applications for different screen sizes and devices.
- Support students in identifying and resolving coding errors while encouraging structured debugging and development practices.
- Mentor learners in using Git and GitHub for source-code management and collaboration.
- Demonstrate frontend development workflows through practical implementation rather than theory alone.

FRONTEND DEVELOPMENT PROJECTS

Online Farmers Marketplace | Final-Year Computer Science Project

- Designed and developed a responsive online marketplace that connects farmers and buyers through a web-based platform.
- Developed user-facing interfaces for registration, login, product browsing, product listings, shopping cart, checkout and order-related interactions.
- Implemented responsive interfaces to support access across desktop and mobile screen sizes.
- Applied HTML, CSS, JavaScript, React.js and Tailwind CSS to develop interactive frontend components and user experiences.
- Structured marketplace functionality around farmer product management, customer browsing and farmer-buyer interactions.
- Used Git and GitHub for source-code management and project development.

OPEN SOURCE CONTRIBUTION

Open Source Contributor

- Contributed to open-source software development through GitHub-based project work.
- Applied version-control practices using Git and GitHub while working within an existing codebase.
